

Alternative Investments in Emerging Markets

KDGG

Kaizen Development Group, LLC

**Insight and Access to attractive
Alternative Investment
Managers in the Brazilian and
African markets**

WHO WE ARE:

As institutional investors continue to look for opportunities in emerging markets, they face a consistent challenge in the identification and evaluation of money managers. The time and resources needed to do the appropriate due diligence is often difficult to justify, resulting in missed opportunities in unfamiliar regions.

KDGG is a partnership uniquely positioned to identify institutionally attractive managers in the markets of Sub-Saharan Africa and Brazil and expose them to foreign AI allocators. Additionally, we have within our group the necessary legal and tax-advising capability to properly establish the mechanisms needed to allocate to new markets.

WHO WE SERVE:

- North American, European & Asian institutional investors looking to allocate funds to hedge fund and private equity managers in Brazil and sub-Saharan Africa (primarily South Africa)
- Qualified investors looking for foreign direct investment opportunities in select regions
- Alternative Investment managers looking for exposure to traditional markets
- Infrastructure, real estate and regional sustainability project managers seeking funding greater than \$50M USD

KDGG consists of legal teams, investment research and marketing professionals that identify and actively promote a select group of managers representing compelling investing opportunities to seasoned institutional investors. We also are a resource for current developments affecting the investing community looking at our representative regions.
